

Habilitation thesis summary

"Particularity of Obstetrics and Gynecology Infectious Syndrome "

Habilitation thesis: "Characteristics of infectious syndrome in Obstetrics and Gynecology" is a synthesis of scientific, academic and professional that we conducted during 1998-2016, as a doctoral thesis "Considerations clinical, bacteriological, histological and immunological therapeutic chorioamnionitis ", March 1998.

Habilitation thesis is drafted in accordance with the recommendations CNATDCU and comprises three sections. The first section describes the personal results obtained in professional fields, teaching and research. The second section presents the goals that I have set in terms of academic and scientific work, and the third section lists the references used in making this thesis.

1. Professional work, teaching and research

Professional activity is closely linked to the Faculty of Medicine in Craiova, where I studied between 1972-1978, with 10 scholarship Republican media three years in a row. We were internal surgery, a contest between 1997-1980, general practitioner at the Medical Dispensary Orodel between 1980-1981, doctor Works by competition from garment factory in Craiova 1981-1982 period, the contest secondary physician Obstetrics and Gynaecology Clinical Hospital No. 1 Craiova in the period 1982-1985, specialist Philanthropy Craiova Municipal Hospital between 1985-1991, MD from 1991 until now and chief physician II Clinical Obstetrics and Gynaecology, between 1998 to 2012 at the Municipal Hospital Philanthropy, Craiova, where I and currently operate.

Teaching activity. I worked as an Assistant Professor at the Faculty of Medicine, Department of Obstetrics and Gynaecology since 1982; -1994 lecturer; Associate 2002; Professor Obstetrics and Gynecology - 2013 Dean of the Faculty of Midwifery and Nursing, University of Medicine and Pharmacy Craiova in 2012. Note that all teaching grades were obtained through competition.

I graduated from UMF Craiova courses MA program "Management of Health Units" between 2005-2007

Coordinate Council of the Faculty of Midwifery and Nursing, are member of the Board of Directors of the University of Medicine and Pharmacy Craiova and member of the Senate of the University of Medicine and Pharmacy Craiova.

From 2011 are spilled II clinical residency coordinator Philanthropy Craiova Municipal Clinic in obstetrics and gynecology specialty.

Engage in mentoring students on the specialized committees to participate in periodic evaluation or work papers and guidance to resident doctors of other specialties, who in obstetrics and gynecology internship curriculum.

The research from the beginning was focused on infectious pathology of the woman. Thus we developed as coordinator contracts: The role and effectiveness Diflucan to treat genital candidiasis resistant. (2001) between UMF Craiova and Pfizer Corporation and project Comparison of efficacy Fenticonazole and other imidazole in vaginal candidiasis recurrent (2001) between UMF Craiova and laboratories Fournial .

I was appointed section coordinator of the World Congress of the International Federation of Obstetrics and Gynaecology - F.I.G.O., Santiago de Chile 2003 in premature rupture of membranes section, congress at which we presented two papers.

In the grant won by competition: Learning by Doing, European project implemented by the European Platform for Youth Development; no. Contract: EN-21-23-2009-R2; [http: /www.anpcdefp/tineret/referinta/2009/Actiunea_2_site_R4_09.pdf](http://www.anpcdefp/tineret/referinta/2009/Actiunea_2_site_R4_09.pdf) ve been operating the expert responsible for Research on Health and Safety.

SEED grant activity within Sport Education for Development Integration; No. EN-21-39-2009-R4; [http: /www.anpcdefp/tineret/referinta/2009/Actiunea_2_site_R4_09.pdf](http://www.anpcdefp/tineret/referinta/2009/Actiunea_2_site_R4_09.pdf), I / allowed developing research skills in public health, given the project the role of expert in health .

Gaining grant Algorithm innovative diagnosis and treatment of acne, AXA II project ID NO POS.C.CE 1433 SMIS41582 code 2013 mi / conferred - as a member of the project - the opportunity to study the correlation between the gynecologic pathology and dermatologică.

Undoubtedly winning the contest grant AE811

"Research on the epidemiology and early diagnosis of cervical cancer in the geographical area Gorj and Dolj" as director of grant in 2013 gave me the opportunity to investigate an area isolated from geographically, in terms of pathology cervical and default of cervical cancer, which in Romania can be considered a public health problem by the high incidence of advanced disease detection, the mortality rate and by the socio-economic consequences.

I carry a coordinator in the "Advice for Roma", in collaboration with the Prefecture of Dolj, Family Planning Centre, the Bar association, Dolj Public Finance Directorate. (2001). We also organized as coordinator program "Family Planning" in high schools in Craiova. (2001)

2 Development research and academic activity.

Professional development activity will follow the acquisition of skills and competencies in order to improve teaching activities, assessment and curriculum development.

Future work will focus on the academic professional training of young doctors through assimilation by them of new knowledge and skills of research-oriented medical education continues.

I also propose that activitarea Nurse students from the School of Midwifery and Nursing to be so qualified as to allow for a listing on the labor market, such values as to stop the exodus of health professionals from Romania. These objectives will be materialized by organizing interactive post-graduate courses, workshops, demonstrations, generally directed toward based medicine and patient monitoring algorithms and patient care.

The main research directions will be represented by researching the implications of infectious diseases in Obstetrics and Gynecology namely **Particularity of infectious syndrome in Obstetrics and Gynecology**, the subject of my thesis empowerment.

The thesis consists of 6 chapters and follows research carried out starting with the amniotic infection correlated with maternal-fetal complications, and later, to analyze pathology of dysplasia and malignancy of the cervix. In work presented pay particular attention to genital infection prevention measures. Are reviewed arrangements for rapid diagnosis of infectious pathology, as well as treatment.

3. Section three presents citations related to the content of the first two sections.
